Data Dictionary / Project Glossary

Ex:

Visitor: The general public

User: A Visitor with a validated account

Stock:

Bid:.....

Ask:.....

Order: ...

Order Book:

Tick Size:

etc.

TCER Spreadsheets

(Test Conditions / Expected Results)

Architectural Diagrams

w/ technologies used

Package structure diagrams

Class diagrams

Sequence diagrams

ERD

Each team member should keep a living/breathing change management document....everything that is done should be documented here, with the responsible party, the date/time (hrs.) dedicated, and a description of the change. Think of it as a diary.

Ex: Bob Smith

Wrote TCER doc. for 9 test cases (tc34 - tc42) for story MP6 (user login)

09/03/20 2 hrs.

These documents should be periodically combined into a single document for the whole team/project.

Change Administration Request and/or Requirement Validation Request

Ex: Our app will have the trade ticker embedded on every viewable page of the frontend (other than the login page). Hence, users can view the ticker, but visitors cannot.
